

Grafco Berman-Type Oral Airways are made of smooth, flexible white polyethylene and utilize a dual channel design that allows a suction catheter or endotracheal tube to slide into the pharyngeal space even if the airway is partially obstructed. The disposable airways are available in six sizes to provide proper sizing for each patient. Kits come complete with all six sizes in a plastic bag or box.

Features:

- Reinforced bite block prevents airway collapse
- Disposable for single-patient use
- Non-sterile, non-toxic polyethylene
- Gas/cold sterilizable
- Not made with natural rubber latex
- Made in the U.S.A.

Item	Description	UOM
3786-12#0	40mm, Neonatal	12/pk
3786-12#1	50mm, Infant	12/pk
3786-12#2	60mm, Child	12/pk

3786-12#5	100mm, Large	12/pk
3786B#0	40mm, Neonatal	100/bx
3786B#1	50mm, Infant	100/bx
3786B#2	60mm, Child	100/bx
3786B#3	80mm, Small	100/bx
3786 KT	40mm, 50mm, 60mm, 80mm, 90mm, 100mm	6/bg
3787 KT	40mm, 50mm, 60mm, 80mm, 90mm, 100mm	6/bx

**This product is not made with natural rubber latex*

Note: Airway will stay in place without securement by keeping patient's head in a tilted position. Taping an oropharyngeal airway in place is contraindicated as it can lead to aspiration if the patient starts to gag or cough and can't expel the device. Airways should be removed intermittently according to your facility's policy and the patient's condition to inspect oral cavities and provide mouth care. Proper sizing is essential to ensure airway patency; device intended to be used by properly trained healthcare professionals.
