

# The Hamilton Collection

Proudly Made in The USA

## Casegood Construction

Drawer fronts are separate from the drawer box, simplifying replacement, if necessary.

Drawer construction includes dowels and staples on sides with an additional bead of glue along perimeter of drawer bottom.

Dressers and bedside cabinets have a stile across the back and between each drawer for structural support.

Self-closing drawers have metal drawer slides that are tested to 100 lb capacity per drawer and have drawer stops for safety. Drawers are easily removable by lifting up over the glides.

Ventilated backs of bedsides and dressers promote airflow.

All units have smooth floor glides for ease of movement.

All bedsides, dressers, and wardrobes have a full bottom board for structural support.

European-style hinges provide superior strength and adjustability. Doors can be removed without removing hinges from either the door or cabinet. Hidden hinges offer 110 degree swing and are self-closing.

Wardrobe clothes bar height is adjustable.

Wardrobes have two stiles across the back for added structural support. We can also supply a gap-filler, if requested, so that the wardrobes can be attached to the wall.

All bedsides, dressers, and wardrobes have a full bottom board for structural support.

All units have smooth floor glides for ease of movement.

Wardrobes provide four top access points to the 4" levelers for easy adjustment with a screw driver or socket ratchet to accommodate uneven floor surfaces.

Optional locks are available for all units. Locks are generally placed on the top bedside drawer or on wardrobe doors. Two keys are provided per lock. Master keys are available with initial order.
